zomato | Zomato Menu Intelligence and Portfolio Strategy

PROJECT OVERVIEW

This project analyzes menu performance across restaurants, cuisines, and pricing tiers to uncover customer engagement patterns, product popularity, and portfolio effectiveness.

The dashboard leverages pricing strategy, customer voting behavior, restaurant performance, and advanced segmentation frameworks to identify growth opportunities, optimization priorities, and high-performing menu categories.

BUSINESS OBJECTIVES

- Identify menu items, cuisines, and restaurants driving the highest customer engagement.
- Evaluate how pricing strategies influence product popularity and customer demand.
- Measure portfolio concentration across Price Tier, Popularity Segment, and Product Strategy.
- Identify Premium Winners, Volume Drivers, Growth Opportunities, and Dormant Premium products.
- Assess city-level and restaurant-level performance to uncover growth and optimization opportunities.
- Support data-driven decisions related to pricing, menu engineering, portfolio management, and customer engagement strategy.

DASHBOARD STRUCTURE

Page 1 — **Zomato Menu Intelligence and Portfolio Strategy**
Comprehensive overview of menu performance, customer engagement, and strategic opportunities.

Page 2 — **Executive Action Plan**
Strategic recommendations and actionable priorities to drive growth, optimize the portfolio, and enhance customer value.

Page 3 — **Segmentation Framework & Business Definitions**
Detailed explanation of segmentation frameworks, thresholds, and business definitions used in the analysis.

KEY IMPACT AREAS

Data-Driven Insights
Actionable insights that drive growth and profitability.

Optimization Focus
Identify opportunities to enhance menu mix and pricing strategy.

Customer-Centric
Understand customer preferences and engagement drivers.

Strategic Impact
Support decision-making across pricing, portfolio, and marketing strategies.

Executive Action Plan: Strategic Recommendations

OUR STRATEGIC PRIORITY

These recommendations are designed to help Zomato drive sustainable growth by scaling what customers love, optimizing the portfolio, leveraging market strengths, and delivering excellence across operations.

GROWTH & INVESTMENT

1 Scale Proven Menu Winners

Prioritize the expansion of Volume Drivers and Signature Products across additional restaurants and cities to maximize customer engagement and revenue growth.

2 Adopt a Dual Growth Strategy

Balance long-term growth through two engines: expand Volume Drivers to maximize reach while strengthening Premium Winners to improve profitability and brand positioning.

3 Position Hyderabad as the Innovation Hub

Use Hyderabad as the primary market for piloting new menu launches, premium offerings, and promotional campaigns before scaling across the country.

PORTFOLIO OPTIMIZATION

4 Rationalize the Dormant Portfolio

Systematically remove, redesign, or reposition Dormant Core and Dormant Premium products to improve menu efficiency and reduce operational complexity.

5 Optimize Menus Around Customer Demand

Encourage restaurants to maintain focused, high-performing menus by replacing low-demand items with proven products that drive strong engagement.

6 Institutionalize Continuous Portfolio Management

Adopt the Product Strategy framework to continuously monitor, reclassify, and optimize menu performance for sustained long-term growth.

MARKET EXPANSION

7 Replace National Strategies with Local Market Strategies

Adopt city-specific menu, pricing, and promotional strategies instead of a uniform national approach to match local demand patterns and maximize performance.

8 Expand Premium Where Demand Already Exists

Accelerate premium expansion only in cities and product categories where customers show strong willingness to pay, ensuring profitable and sustainable premium growth.

OPERATIONAL EXCELLENCE

9 Build Stronger Partnerships with Local Restaurant Leaders

Strengthen collaborations with high-performing local restaurant brands and replicate their operational best practices to drive higher customer engagement.

10 Protect Customer Experience as a Competitive Advantage

Maintain consistently high dining and delivery service standards across partners, as top-performing restaurants excel through quality execution and customer satisfaction.

THE OUTCOME: Higher Customer Engagement | Stronger Revenue Growth | Improved Profitability | Sustainable Market Leadership

Segmentation Framework & Business Definitions

METHODOLOGY

Price Tier and Product Popularity thresholds were established using distribution analysis, histogram evaluation, and percentile assessment to create balanced and meaningful business segments. Product Strategy Segments are derived by combining pricing position with customer engagement performance to identify growth opportunities, premium successes, and optimization priorities.

PRICE TIER

Purpose

Classifies menu items based on pricing position to evaluate affordability, premiumization opportunities, and customer value perception.

POPULARITY SEGMENT

Purpose

Classifies menu items based on customer engagement levels using customer vote volume to understand demand and product maturity.

PRODUCT STRATEGY SEGMENT

Purpose

Combines **Price Tier** with **Popularity Segment** to determine strategic action for each menu item and guide growth, rationalization, and premium optimization decisions.

PRICE TIER FRAMEWORK

TIER	MENU PRICE (₹)	STRATEGIC ROLE
Budget	≤ 150	Customer acquisition & volume generation
Value	151 – 300	Portfolio breadth & engagement growth
Premium	301 – 500	Revenue optimization & premium positioning
Luxury	> 500	Brand image & niche experience

POPULARITY SEGMENT FRAMEWORK

SEGMENT	CUSTOMER VOTES	WHAT IT INDICATES
Dormant Products	0	No customer traction; lowest demand
Niche Products	1 – 15	Low but existing interest; early-stage demand
Popular Products	16 – 50	Growing acceptance; emerging demand
High-Performing Products	51 – 100	Strong customer approval and traction
Signature Products	101+	Top performers; highest customer loyalty

PRODUCT STRATEGY SEGMENT (NEW LOGIC)

SEGMENT	LOGIC (Price Tier + Popularity Segment)	STRATEGIC ACTION
Volume Drivers	Budget / Value + Popular / High-Performing / Signature	Scale, promote, ensure availability & visibility
Premium Winners	Premium / Luxury + Popular / High-Performing / Signature	Strengthen premium positioning & maximize profitability
Dormant Premium	Premium / Luxury + Dormant / Niche	Reposition, reprice, or discontinue
Dormant Core	Budget / Value + Dormant / Niche	Rationalize portfolio & simplify menu

WHY THIS FRAMEWORK MATTERS

This integrated framework connects pricing strategy with customer demand to drive data-driven decisions for growth, optimization, and long-term value.

Clear Market Positioning
Understand where each menu item stands in the pricing landscape.

Demand Intelligence
Identify customer favorites and emerging opportunities.

Actionable Strategy
Directs growth, premiumization, and rationalization actions.

Portfolio Optimization
Improve menu efficiency and maximize business impact.

Sustainable Growth
Focus resources on what customers love and what drives profits.

This framework ensures every menu item is evaluated objectively and aligned with customer demand, enabling Zomato to build a stronger, smarter, and more profitable menu portfolio.
